FOR IMMEDIATE RELEASE

SNYDERVILLE BASIN WATER RECLAMATION DISTRICT

**MONTHLY
“FLUSH INDEX”**

PARK CITY, UT. (January 10, 2022) -- The Snyderville Basin Water Reclamation District calculates a monthly “flush Index” for the purpose of estimating the number of visitors (visitor nights) that were present in the Park City/Snyderville Basin area. Listed below is the latest monthly index with a comparison from the previous year.

December 2021 Visitor Nights “Flush Index”	% Difference from December 2020
408,623 +/-	11.0% Increase

The “Flush Index” is based on historical wastewater flows measured by the Snyderville Basin Water Reclamation District. Actual methodology involves a statistical model that considers the quantity of wastewater, the strength of wastewater, monthly visitation patterns and an adjustment for rain or snow melt water seeping into the system.

“Tip of the Month”

**Prevent sewage back-ups and protect the environment by
placing food waste in the trash and not down the drain!**

The Snyderville Basin Water Reclamation District (SBWRD) collects and reclaims the wastewater generated by more than 13,000 homes and commercial enterprises in Park City and the Snyderville Basin. Its mission is “...to protect public health and the environment by developing, integrating, and implementing fiscally responsible solutions to wastewater, water reclamation and watershed protection issues.” Visit the Snyderville Basin Water Reclamation District’s website at www.sbwrld.org.
